

Welcome to the team!

Fernando Junior Leblanc-Carrera, P.Eng. Director of Engineering

Art Massif is proud to announce that **Fernando** is joining the team as **Director of Engineering**. With his experience and leadership skills, his mandate will be to further raise our level of technical expertise to support you, our partners and customers, with your ambitious projects.

After obtaining his bachelor's degree in civil engineering, Fernando rapidly developed his skills in mass timber building. His passion for new challenges led to his former roles as a structural designer, project manager and design team leader where he gained extensive experience, especially in the design-build format.

His deep understanding of customer's requirements and his architectural vision have allowed him to play a pivotal role in many award-winning projects by finding appropriate and cost-effective solutions.

His knowledge of mass timber is equally impressive and ranges from inspection of trestle bridges, to design of innovative structural systems and connections optimized for fabrication.

As a team leader, Fernando is extremely proactive and always strives for the highest quality of work. Above all, he believes that success can only be achieved through collaboration and effective communication.
